

# Manage aviation exposures, threat intelligence and advanced underwriting analytics in one platform

From political uncertainty to increased geopolitical tension, today's world poses a new challenge to the Aviation, Aerospace and Transportation sectors.

Insurers that wish to excel in this environment will leverage technology and data to help them navigate these new challenges.

## Digitise your aviation portfolio

Automatically digitise your aviation portfolios and maintain them centrally as you renew or write new business.

## Track and monitor your assets in real-time

Look through the lens of both Operator and Lessor with our platform's ability to track and monitor your live Aviation portfolios in the air and on the ground.

## Enable aggregation and accumulation reporting

Insurwave offers real-time reporting in standard and custom zones, featuring TIV and actual exposures based on contracted policies in force.

## An end-to-end exposure monitoring solution

Establish a command centre powered by portfolio and third party data feeds in one place, creating a robust single source of truth for Aviation underwriters and exposure managers to respond to events as they unfold.

## Market-leading threat intelligence

Take advantage of the latest third-party data sources on the Insurwave platform, such as threat intelligence provided by Osprey, the leading threat and security specialist, which provides the latest notifications and overlays.

# Manage your aviation exposure with confidence

and gain a competitive edge with threat intelligence automation and real-time insights.

“Our collaboration with Insurwave bolsters our vision to create a data-driven exposure management team that can provide our underwriters with precise information at the point of pricing, through to live tracking fleets and the policies in force. Insurwave’s platform gives us the tools to do that.”

**Chris Weller**  
HEAD OF EXPOSURE MANAGEMENT  
AT INIGO INSURANCE

## Vision to be data-driven

Insurwave’s SaaS platform sets a precedent for other aviation insurers to embrace a more effective approach for exposure management by collecting and aggregating data on risks in real-time, linked to agreed policy terms and other third-party data sources.
