

Manage your marine exposure with threat intelligence, automation, and real-time insights

From political uncertainty to increased geopolitical tension, today's world poses a new challenge to the Marine insurance market. Organisations that wish to excel in this environment will leverage technology and data to help them navigate these new challenges and unlock:

Detailed exposure data

To help you model and understand the exposure of both the static and dynamic assets in your portfolio in just a few clicks.

Accurate asset tracking

With conflicts often erupting at a moment's notice, simple tracking is no longer enough. Our solution can help you react quickly to emerging events.

Market leading threat intelligence

Our partnership with maritime security specialist, Ambrey offers you immediate threat updates and overlays for your portfolio.

An end-to-end solution for marine insurance

Marine insurance can be labour-intensive, but doesn't have to be. Insurwave automates zone breach detection and billing to eliminate unnecessary admin from your workload.

Your vessel has exited a war zone

AMBREY

Manage your marine exposure with confidence

and gain a competitive edge with threat intelligence, automation and real-time insights.

“Today’s world poses a significant challenge to the marine insurance market, with shifting conflicts creating on-going events across the globe. However technology platforms like Insurwave give us the ability to be more closely aligned with our clients and derive meaningful insights from a consolidated data source.”

James Havard
HEAD OF EXPOSURE MANAGEMENT
AT CONVEX INSURANCE

Embracing the future

As geopolitical turmoil continues, the insurance industry must embrace technology as a vital ally. By enhancing risk assessment, streamlining data processing, and improving operational efficiency, technology not only supports insurers in navigating current uncertainties but also prepares them for future challenges.
